video - all the more accessible and instruction-free for the common lay people. Today, all it takes is an instant - to shoot a great nature shot or new story, lug it into a notebook and transmit it anywhere on the world through the web. This efficacy calls for hi-tech assembly of digital tools, equipment and imaging devices, which are now easily available to the image maker. The digital option offers them - a wider choice of imaging tools and devices, a guicker, non-film based output and of course, the unmatched convenience of easily adapting the equipment to suit one's individual needs. What's more important is that while digital imaging options.

printers have made high-quality photography - both still and
